

UltraTouch & LEED™

Natural Cotton Fiber Insulation

The US Green Building Council announced the creation of the first voluntary national green building standard for developing high-performance, sustainable buildings - **LEED (Leadership in Energy and Environmental Design) Green Building Rating System**.

UltraTouch Natural Cotton Fiber Insulation can contribute to earning several LEED credits throughout the program. Listed below are the categories and prerequisites where UltraTouch may contribute.

Energy & Atmosphere

Prerequisite 2 - Minimum Energy Performance

Credit 1 - Optimize Energy Performance

Comments

UltraTouch facilitates compliance with ASHRAE 90.1-1999.

Materials & Resources

Credit 4 - Recycled Content

Credit 5 - Local/Regional Materials

Credit 6 - Rapidly Renewable Resources

UltraTouch contains over 80% Post-Industrial recycled content.

If project is within 500 miles of Bonded Logic facility in Chandler, AZ 85225.

UltraTouch utilizes cotton as one of its main material sources.

Indoor Environmental Air Quality

Prerequisite 1 - Minimum IAQ Performance

Credit 4 - Low Emitting Materials

UltraTouch contains no harmful irritants or chemicals that can pose VOC concerns.

Innovation In Design

Credit 1 - LEED Innovation Credit

UltraTouch can contribute to innovative design credits that involve a plan to utilize innovative material choices throughout the project.
